Professional Summary

Final-year Information Technology student with hands-on experience in Generative AI, Backend Development, and Full-Stack Web Development. Experienced in building AI-powered applications and scalable web solutions, with a strong interest in LLM-based systems, backend engineering, and intelligent software solutions. Passionate about solving real-world problems through practical engineering and modern technologies.

Education

International Institute of Information Technology Bachelor of Engineering in Information Technology	2023–2027 CGPA: 9.57/10
Maloo International School Higher Secondary Education (12th Grade)	2022–2023
Podar International School Secondary Education (10th Grade)	2020–2021 Percentage: 90%

Skills

Programming Languages:	Java, JavaScript, Python
AI & Generative AI:	LLMs, Tokenization, Embeddings, RAG, Vector Databases, LangChain, Lang-Graph, Ollama, Prompt Engineering
Frontend Development:	HTML, CSS, Bootstrap, React.js
Backend Development:	Node.js, Express.js, REST APIs, JSON
Database:	MongoDB, SQL
Tools & Platforms:	Git, GitHub, Postman
Soft Skills:	Problem Solving, Communication, Teamwork, Time Management

Projects

My Own AI — Vector Database and RAG System	GitHub
- Built a Vector Database in Python with HNSW, KD-Tree, and Brute-Force search algorithms. - Implemented Cosine, Euclidean, and Manhattan distance metrics for similarity search. - Integrated Ollama-based embeddings and LLMs to build a document-based RAG pipeline. - Developed FastAPI REST endpoints for vector search, document management, benchmarking, and RAG workflows. Technologies: Python, NumPy, FastAPI, Ollama, HNSW, KD-Tree, RAG, Embeddings	
HeartCave – Anonymous Peer Support Platform	Live Demo
- Developed a full-stack anonymous peer support platform using React, Node.js, Express.js, and MongoDB. - Implemented JWT-based authentication and authorization for secure user account management. - Built REST APIs for user profiles, posts, comments, and communication workflows. - Integrated Socket.IO for real-time messaging and notifications between matched users. - Implemented privacy-focused features including anonymous identities, blocking, reporting, and profile management. Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, REST APIs
